

**NEW**

## ***The New Heavy Duty Seeloc Washer a self-sealing washer for knockout and large through holes***

**You asked APM Hexseal for a Seeloc Washer that can handle higher torque values for those sealing applications that require greatly increased torque.**

**We give you the *Heavy Duty Seeloc Washer* that has been designed to withstand a minimum of 50% higher torque values over the original Seeloc Washer.**

**To be used in applications where higher torque values are required. APM Hexseal offers a variety of popular 1/2" (14mm) & 1" (25.4mm) O.D. sizes for the food processing, hydraulic, chemical handling, marine, medical, off-road construction equipment, electrical & electronic and a myriad of commercial, Industrial equipment applications.**

**Ideal for sealing optional knockout holes / larger through holes found when mounting hardware and covers to electrical cabinets and machinery.**

**When Just Fastening Isn't Enough®
