Re: Conflict Materials

To our valued customers,

We have received requests for information on Conflict Materials from many of you, and understand your concerns.

This originated from the Securities and Exchange Commission, proposing significant requirements of due diligence regarding the so-called "conflict materials". This was put into the Dodd-Frank Wall Street Reform and Consumer Protection Act. Section 1502 amends Section 13 of an earlier Act, intending to limit trade in minerals originating from sources controlled by armed groups operating in the Democratic Republic of Congo and adjoining countries.

The specified Conflict Materials are: tantalum, Cassiterite (tin), gold, and Wolframite (tungsten).

As a privately-held corporation, we are not required to file reports with the SEC, and are exempt from Section 13 (a) and 15(d) reporting. Therefore Sorenson Lighted Controls is exempt from the Conflict Materials reporting requirements.

However, we understand your concerns with this issue, and will, to the best of our abilities survey our vendors to identify any supply chain issues relating to Conflict Materials.

We can state, at this time, we neither purchase, nor believe there is any incidental content, of either tantalum or gold in any of our manufactured product

William Stephens General Manager
